Education

3D Graphics, Futuregames, 2017-2019

Higher vocational education in game development with focus on 3D graphics.

Game Development, Stockholms University, 2014-2017

Bachelor's programme in game development with focus on game design.

Social Science, Nacka Gymnasium, 2009-2012

Upper secondary education with focus on historical, economic and social science perspectives.

Game Projects

3D Artist, "Out of the Abyss", Futuregames, 2018

I mainly worked with modular environment sets and props for the various levels. A fast paced first person shooter developed in Unity.

Environment & Tech Artist, "Little Reaper", Futuregames, 2017

Side scroller platformer game made in UE4. I mainly worked in engine with level art and lighting to achieve environmental storytelling. I also set up shader and material blueprints.

3D Artist, "Figure Attack Golf", Futuregames, 2017

I was a 3D artist creating various environment pieces and props for the level. Figure Attack Golf is a local multiplayer top down party game developed in UE4.

3D Artist, "Tempest", Stockholms University, 2017

Tempest is an online multiplayer arena shooter where I created props and modular skyscrapers.

3D Artist, "Dimensional Rift", Stockholms University, 2016

VR game and accessibility project developed in Unity. My main responsibility was making sure all assets met our accessibility goals. I made textures and modular props.
